

# On-Screen Projection Setup

## Computer to Projector

### 1. Connecting Laptop to Projector (2 Cables)

- Electrical cord
- Monitor cable

### 2. Mirroring the Two Together

PC

- Select keys Fn + F5

MAC

- Monitor configuration must be set at 1024 x 768-85 Hz, millions of colors, and merge the two screen icons together (see other side of sheet)

3. You may have to use the remote to flip through Source options to communicate

Tip

- Power off the projector, before shutting down the computer

Projector's COM Logo Display

- Menu  $\downarrow$ , A/V mute (to turn on and off), and select logo effects- A/V choice
- ESC to get out

---

## MAC: Open Monitors Control Strip

Set the Color LCD (1 - monitor)

Set the Epson PS (2 - projector)

Arrange Option

Merge the two screen icons together
